Audience: Healthcare Organizations
Release Date: 5/3/2018

We are pleased to announce the release of enhancements to the ShiftWise VMS, including:

- Cost Center Rights Updates
- Enter Key Functionality Update
- Alphabetized Bill Codes
- Incorrect Password Workflow

Cost Center Rights Page

This update allows users to search by cost center and to see all of the associated users who have permissions to view associated units. Alternatively, users can search by username and see all cost centers which designated users can view.

Enter Key Functionality Update

The Enter key can now be utilized throughout ShiftWise as an alternative to clicking the Go button.

Alphabetized Bill Codes

The Bill Codes are now alphabetized within the Timeslip line items (Bill Hours and Bill Expenses) and Rate Plan Modifiers. The value of *Standard* will always appear at the top of the list within the Timeslip line items.

Incorrect Password Workflow

This message will display when an incorrect password is entered: *"Invalid User Name or Password: Please try again."* After clicking the OK button, the user will be redirected to the password field on the login page to make modifications.
